Report on Defense Business System Modernization
FY 2005 National Defense Authorization Act, Section 332

Introduction

This report fulfills the requirement of Section 332, “Defense Business Enterprise Architecture, System Accountability, and Conditions for Obligation of Funds for Defense Business System Modernization,” subsection (h) Budget Information of the FY05 National Defense Authorization Act.

The DoD’s Select & Native Programming Data System – Information Technology (SNaP-IT) was used as the basis for reporting the information required under subsection (h). SNaP-IT is also the same application that collects and assembles the information required in support of the budget submitted to Congress under section 1105 or title 31, for fiscal year 2009.

Section 332 defines Defense Business Systems in a slightly broader context than does SNaP-IT. Section 332 definition includes “IT and IA Infrastructure used to support business activities” while SNaP-IT categorizes both Infrastructure and IA as separate investment types. Within the DoD, the Global Information Grid Enterprise Information Environment Mission Area (EIEMA) supports both warfighting and business systems and is not readily severable into business vs. warfighting infrastructure; similarly IA initiatives and investments in the EIEMA (such as Public Key Infrastructure) support both warfighting and business domains. Hence, the SNaP-IT definition of Business Applications” is the basis for reporting the “Defense Business Systems” as defined in section 332.

To answer (h)(3), “for each such system, identification of the official to whom [approval] authority for such [defense business] system is delegated under subsection (f), “DoD has identified the Principal Staff Assistant (PSA) as the authority on record in SNaP-IT as of January 12, 2008.
